

# Bridges Clinic

## Closing the Access Gap In Healthcare

*There is a great need for medical care but sadly because of the price tag associated with it, only a select few have the privilege of attending a primary care physician. Our mission was to provide that quality care to our economically disadvantaged community through the establishment of a pop-up clinic.*

### Healthcare Services We Provided

- Triage
- Blood Pressure Screening
- Blood Glucose Screening
- Annual Wellness Checks
- Women's Health
- Minor Acute Injury Assessment
- Wound Care
- Respiratory Related Illnesses
  - Allergies, Sore Throat, Cold, Flu
- Infections
  - Ear Ache, Pink Eye
- Free Prescriptions
- Many More Medical Resources for Various Conditions

## OUR IMPACT

54

---

low-income uninsured patients were treated by our two physicians in only six hours

50%

---

of the women who attended the clinic had their first women's health consultation ever

37%

---

of patients who had their glucose levels examined, were at risk for diabetes, but received medication to treat it

*"This is why we became doctors. Not to treat the wealthy patients that can afford the care, although that is important; But to serve the underserved."*
